

CONFIDENTIAL INVESTOR PRESENTATION

## Fund III

European Magical-Equid Biotech & Adjacencies  
Vintage 2026 — €750m Target

First Close Targeted: Q3 2026

Final Close Targeted: Q1 2027

Managed by Unicorn Ventures Partners GmbH & Co. KG | Frankfurt am Main | London | Zurich

Fictional document prepared solely for software testing purposes. Unicorn Ventures Fund III, SCSp is not a real entity.

## EXECUTIVE SUMMARY

# Fund III at a Glance

*Twelve years of magical-equid biotech investment discipline, applied to a market entering its most consequential decade.*

TARGET FUND SIZE

**€750m**

Hard cap €900m

INVESTMENT PERIOD

**5 years**

10+1+1 fund term

PORTFOLIO TARGET

**15–20**

Holdings (incl. follow-ons)

GP COMMITMENT

**2.5%**

€18.75m at target

| Combined Track Record                     | Fund I (2018)         | Fund II (2022)      | Combined         |
|-------------------------------------------|-----------------------|---------------------|------------------|
| Fund Size                                 | €220m                 | €500m               | €720m            |
| Net IRR Since Inception                   | 18.4%                 | 17.9%               | 18.0% (weighted) |
| TVPI (Net)                                | 2.13x                 | 1.52x               | 1.71x (weighted) |
| DPI (Net)                                 | 1.77x                 | 0.38x               | 0.81x (weighted) |

THE OPPORTUNITY

---

# Why Now

*A market entering its most consequential decade — and the team best positioned to capture it.*

WHY NOW

# A Market Entering Its Most Consequential Decade

*Sustained operational maturation, regulatory tailwinds, and the strongest exit cohort in the segment's history converge on the 2026 vintage.*

Figure 1. Global magical-equid biotech market size, 2020–2030E. Source: industry consensus (Dealroom, Pitchbook, EMA); fund analysis for forward years.

| Market Maturation                                                                                                                   | Regulatory Tailwinds                                                                                                                                   | Exit Cohort                                                                                                                                                                         |
|-------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Global market €142bn in 2025 (vs. €62bn in 2020); industry consensus €287bn by 2030 (15.1% CAGR). European share approximately 38%. | EMA-approved magical-equid therapeutics: 4 in 2020 to 18 by YE-2025. PRIME pathway cuts median time-to-MA by ~11 months. Swiss BLV framework resolved. | 23 disclosed exit events in 2025 (vs. 9 in 2022). Strategic acquirers (Bayer, Boehringer, Vetoquinol, Idexx, Zoetis) systematically active. Fund I delivered 4.2x exit at PegaTech. |

## WHY NOW

# Sub-Sector Conditions Are the Strongest We Have Seen

*Each of the fund's mandate areas exhibits supportive dynamics across funding, valuations, exits, regulation, and talent – a configuration we have not previously observed in this combination.*

| Sub-Sector                        | 2025 Funding | Valuations | Exit Activity | Regulatory | Talent Pool | Fund III View                            |
|-----------------------------------|--------------|------------|---------------|------------|-------------|------------------------------------------|
| Genetics & Breeding               | Strong       | Strong     | Building      | Strong     | Constrained | Core allocation; selective new positions |
| Veterinary Biotech & Therapeutics | Very strong  | Strong     | Strong        | Strong     | Strong      | Largest sub-sector exposure target       |
| Horn Materials & Bio-fabrication  | Strong       | Strong     | Building      | Neutral    | Constrained | Concentrated bets on scaled producers    |
| Nutrition & Feed                  | Neutral      | Neutral    | Strong        | Neutral    | Strong      | Selective platform/roll-up plays         |
| Digital, Data & Platform          | Strong       | Strong     | Building      | Neutral    | Strong      | B2B-pure businesses preferred            |

Cell ratings reflect the General Partner's qualitative assessment informed by proprietary deal-flow analysis, primary management dialogue, and reference to Dealroom and Pitchbook market data. Ratings are forward-looking judgements over a 24–36 month horizon and are not a recommendation.

THE TRACK RECORD

---

# Why Us

*Twelve years, two funds, twenty-three investments — and a track record built on disciplined underwriting.*

## WHY US

# Track Record – Twelve Years, Two Funds

Both funds materially outperform Cambridge Associates vintage medians; Fund I in late-harvest, Fund II in active harvest after the September 2025 Celestial Mane positive Phase IIb read-out.

Figure 2. TVPI build-up by fund. DPI/RVPI split shown to indicate maturity stage. Both funds demonstrate consistent compounding versus their respective vintage years.

Fund I returned its first euro of distributed capital in 2020 (Y2) and crossed 1.0x DPI in 2024. Fund II returned first capital in 2023 (Y1) and is on track to cross 1.0x DPI in 2027–2028 based on the current realisation trajectory at Celestial Mane and the Ätherhoof secondary programme. Both funds have been managed with consistent loss discipline (1.4% combined loss ratio) – a fund-level discipline we expect to maintain in Fund III despite the larger fund size.

## WHY US

# Consistent Outperformance vs. Vintage Benchmarks

Both funds have outperformed the Cambridge Associates European VC vintage median throughout their lifecycle – including during the most challenging vintages of 2018 and 2022.

Figure 3. Net IRR since inception, charted against the Cambridge Associates European Venture Capital benchmark (median) for the respective vintage years.

**540 bps**

Fund I vs. CA 2018 vintage median (18.4% vs. 13.0%).

**720 bps**

Fund II vs. CA 2022 vintage median (17.9% vs. 10.7%).

**Top quartile**

Combined performance ranks top quartile across both vintage cohorts.

## WHY US

# Loss Discipline Across 23 Investments

Across two funds and twelve years, only three of twenty-three investments have returned less than cost. Underwriting discipline is the foundation of repeatable performance.

Figure 4. Distribution of investment outcomes across Fund I and Fund II combined (23 investments). Loss ratio measured by capital at risk.

## Underwriting Discipline

We routinely walk away from competitive processes where pricing exceeds our underwriting standards – we declined three processes in Q1 2025 alone that subsequently closed at 1.4–1.6x our maximum acceptable price. We decline approximately 89% of opportunities reaching letter-of-intent diligence. Our discipline is reflected in the loss ratio: 1.4% across both funds versus a Cambridge Associates median of 4.2% for the European VC cohort.

## Position-Sizing Discipline

Concentration is actively managed at the fund level. When mark-ups push individual positions above the 15% single-position hard cap, we have executed remediation through orderly secondary trims (Ætherhoof, November 2025: 14.8% → 11.2%, generating €18.0m realised gain). Core position-sizing discipline at investment is approximately 4–6% of fund size at cost for primary deployments.

## WHY US

# Selected Realisation Track Record

Five realisation events from Fund I and Fund II illustrating the breadth of exit pathways our portfolio companies have achieved.

| Company                     | Fund | Sub-Sector          | Year | Exit Type         | Gross MOIC | Outcome Detail                                                           |
|-----------------------------|------|---------------------|------|-------------------|------------|--------------------------------------------------------------------------|
| PegaTech Solutions GmbH     | I    | Genetics & Breeding | 2024 | Trade sale        | 4.2x       | Acquired by Bayer Animal Health for €310m enterprise value               |
| LumineEquus AB              | I    | Veterinary Biotech  | 2023 | IPO               | 3.6x       | Listed on Nasdaq Stockholm at SEK 285/share                              |
| Caparison Therapeutics      | I    | Veterinary Biotech  | 2025 | Trade sale        | 2.8x       | Acquired by Vetoquinol for €185m at signing                              |
| Hippo Velvet Materials      | I    | Horn Materials      | 2024 | Secondary         | 2.4x       | Sold to growth investor at €88m post-money                               |
| Ætherhoof Genomics GmbH     | II   | Genetics & Breeding | 2025 | Partial secondary | 3.82x      | Trim from 14.8% to 11.2%; €18m realised gain at Q4 transaction price     |
| Celestial Mane Biotech S.A. | II   | Veterinary Biotech  | 2025 | In-license deal   | 4.33x      | \$220m upfront + up to \$680m milestones + tiered double-digit royalties |

“Strategic acquirers in our segment are systematically active. Bayer, Boehringer, Vetoquinol, Idexx, and Zoetis have between them executed twenty-three magical-eqid biotech acquisitions in the 2023–2025 window. We have direct working relationships with each.”

THE PLAN

---

# Strategy & Approach

*Same mandate, expanded capacity. Building on what has worked, with the scale and team for what comes next.*

## STRATEGY

# Fund III Investment Strategy

Same sector mandate as Fund II, with an expanded capacity for selective late-stage and platform opportunities – informed by the deal flow we have already begun to see at scale.

Figure 5. Fund III target capital allocation by strategy (left) and geography (right).

| Strategy Bucket                | Allocation | Holdings | Ticket Range                           | Sourcing Approach                                                       |
|--------------------------------|------------|----------|----------------------------------------|-------------------------------------------------------------------------|
| Core Early-Growth (Series A/B) | 60%        | 10-12    | €20-50m primary + reserves             | Continuation of Fund II approach – proactive thesis-driven              |
| Selective Late-Stage / Pre-IPO | 25%        | 4-6      | €40-80m primary                        | Banker-led processes, secondary opportunities, direct outreach          |
| Platform / Roll-up Plays       | 10%        | 1-2      | €60-100m equity ticket                 | Sponsor-led secondaries, family-office succession, GP-led continuations |
| Opportunistic Reserves         | 5%         | —        | Follow-on for existing high-conviction | Follow-on for high-conviction Fund II positions                         |

## STRATEGY

# Active Pipeline at Fund III First Close

*Eight identified targets in active diligence at the time of this presentation – representing approximately €375m of cumulative ticket capacity. The pipeline is balanced across sub-sectors and geography.*

| Codename                  | Sub-Sector                    | Geography          | Stage              | Indicative Ticket        | Status                           | Sourcing Channel                          |
|---------------------------|-------------------------------|--------------------|--------------------|--------------------------|----------------------------------|-------------------------------------------|
| <b>Project Polaris</b>    | Veterinary Biotech            | Boston, USA        | Series B           | €50m primary             | Confirmatory diligence           | Outbound – partner network referral       |
| <b>Project Andromeda</b>  | Genetics & Breeding           | Cambridge, UK      | Series A           | €28m primary             | Term sheet negotiation           | Inbound – banker process                  |
| <b>Project Cassiopeia</b> | Horn Materials                | Lyon, France       | Growth             | €60m secondary + primary | Initial diligence                | Outbound – proactive thesis-driven        |
| <b>Project Vega</b>       | Digital / Platform            | Tel Aviv, Israel   | Series B           | €35m primary             | Initial meetings                 | Inbound – co-investor referral            |
| <b>Project Lyra</b>       | Veterinary Biotech            | Munich, Germany    | Series A           | €22m primary             | Confirmatory diligence           | Inbound – Stellargrove cross-introduction |
| <b>Project Orion</b>      | Genetics & Breeding           | Singapore          | Series B           | €45m primary             | Initial diligence                | Outbound – emerging markets thesis        |
| <b>Project Phoenix</b>    | Veterinary Biotech / Platform | Basel, Switzerland | Series C / Pre-IPO | €80m primary             | Confidential management dialogue | Outbound – long-cultivated relationship   |
| <b>Project Sirius</b>     | Nutrition & Feed              | Madrid, Spain      | Growth             | €55m equity (recap)      | Initial diligence                | Inbound – sponsor secondary process       |

Pipeline is dynamic and confidential. Codenames preserved to protect competitive position. Status as of presentation date; some opportunities may close, fall away, or be displaced before Fund III first close. Conversion rate from confirmatory diligence to closing has historically run at approximately 60% across Fund I and Fund II.

## STRATEGY

# How We Compound Value

*Our approach to value creation rests on four pillars, refined over twelve years of European magical-equid biotech investing.*

| 1. Active Board Engagement                                                                                                                                                                                                                                                                                                                                                                                                        | 2. Operational Network                                                                                                                                                                                                                                                                                                                                                                           | 3. Regulatory Acceleration                                                                                                                                                                                                                                                                                                                                      | 4. Exit Architecture                                                                                                                                                                                                                                                                                                                                                  |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Each Fund III investment receives a dedicated investment partner and a designated operating partner. We commit to a minimum cadence of monthly engagement during the value-creation phase, escalating to weekly during transition events (regulatory inflection, commercial scale-up, M&A process). Across both prior funds, our designated partner has held a board seat or formal observer role at 100% of portfolio companies. | Our portfolio companies have access to a curated network of 47 senior advisers across veterinary clinical operations, regulatory affairs, commercial development, and selected scientific specialties. We have facilitated 84 such introductions across Fund II portfolio companies in 2024–2025 alone. Our Operating Partner Dr. Ingrid Lechner (joined 2025) leads this function for Fund III. | Our regulatory practice — led by Dr. Lechner — supports companies through EMA scientific advice, PRIME application, and Marketing Authorisation. We have actively guided four PRIME applications across the funds; the latest (Celestial Mane, granted June 2025) shaved approximately 9 months from the regulatory timeline relative to standard MAA pathways. | Exit architecture begins at investment. We map credible acquirers and exit windows during Stage-1 diligence; we maintain working relationships with the strategic-development teams at each of Bayer, Boehringer, Idexx, Vetoquinol, Zoetis, IDH, and selected biotech-pharma generalists. Six of seven Fund I exits originated from these established relationships. |

THE PEOPLE

---

# Senior Team

*Six senior professionals. €4.2bn deployed. Eighty-plus board seats.*

## THE TEAM

# Senior Investment & Operating Team

*Six senior professionals with combined €4.2bn of capital deployed and over 80 board seats held across European magical-equid biotech and adjacent sectors.*

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                |

## FUND III TERMS

# Term Sheet — Fund Structure & Economics

*Indicative principal terms; complete documentation under preparation. Defined terms in the Limited Partnership Agreement (LPA) shall prevail in case of conflict.*

| Fund Structure               |                                                                                                                                                                        |
|------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Fund Name</b>             | Unicorn Ventures Fund III, SCSp                                                                                                                                        |
| <b>Legal Form</b>            | Société en Commandite Spéciale (SCSp) under the laws of the Grand Duchy of Luxembourg                                                                                  |
| <b>AIFM</b>                  | UVP Management S.à r.l. (Luxembourg) — authorised AIFM under the AIFMD                                                                                                 |
| <b>General Partner</b>       | UVP GP III S.à r.l. — wholly owned subsidiary of Unicorn Ventures Partners GmbH & Co. KG                                                                               |
| <b>SFDR Classification</b>   | Article 8 (sustainability characteristics; do-no-significant-harm framework)                                                                                           |
| <b>Fund Term</b>             | Ten (10) years from the Final Closing Date, with two (2) one-year extensions at the discretion of the GP, subject to LPAC consent                                      |
| <b>Investment Period</b>     | Five (5) years from the Final Closing Date; may be terminated earlier upon 75% deployment, by GP election with LPAC consultation, or upon Key Person Event             |
| <b>Reporting Currency</b>    | Euro (€)                                                                                                                                                               |
| Capital                      |                                                                                                                                                                        |
| <b>Target Fund Size</b>      | €750 million in aggregate Capital Commitments                                                                                                                          |
| <b>Hard Cap</b>              | €900 million in aggregate Capital Commitments                                                                                                                          |
| <b>Minimum LP Commitment</b> | €10 million; lower commitments accepted in exceptional cases at the discretion of the GP                                                                               |
| <b>GP Commitment</b>         | Minimum 2.5% of total Capital Commitments (€18.75 million at target), of which at least 60% in cash; remainder by management fee waiver as permitted by US tax counsel |
| <b>First Close Target</b>    | Q3 2026                                                                                                                                                                |
| <b>Final Close Target</b>    | Q1 2027 (no later than 18 months from First Closing Date)                                                                                                              |
| Economics                    |                                                                                                                                                                        |

|                                                |                                                                                                                                                                                         |
|------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Management Fee — Investment Period</b>      | 1.85% per annum on Total Commitments, payable semi-annually in advance. Stepped down to 1.50% per annum on Net Invested Capital following the end of the Investment Period.             |
| <b>Management Fee — Post-Investment Period</b> | 1.50% per annum on Net Invested Capital (cost less write-offs and realisations), payable semi-annually in advance                                                                       |
| <b>Carried Interest</b>                        | 20% of net realised profits, after the LPs have received (i) return of all capital contributions and (ii) the Preferred Return                                                          |
| <b>Preferred Return</b>                        | 8% per annum on drawn Capital Contributions, compounded annually                                                                                                                        |
| <b>GP Catch-up</b>                             | 100% catch-up to the GP after the Preferred Return until the GP has received 20% of cumulative net profits                                                                              |
| <b>Distribution Waterfall</b>                  | European-style with deal-by-deal escrow during the Investment Period. Standard waterfall: (i) return of contributions, (ii) Preferred Return, (iii) GP catch-up, (iv) 80/20 carry split |

## FUND III TERMS

# Term Sheet — Investment Restrictions & Mechanics

Continued from previous page. Cross-references to the LPA cited in [brackets].

| Investment Restrictions                  |                                                                                                                                                                                                                                                                                    |
|------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Single Position Limit</b>             | Maximum 15% of Total Commitments invested in any single Portfolio Company at cost; maximum 25% on a Fair Value basis at any time. The GP shall remediate any breach within four reporting quarters [LPA §7.4].                                                                     |
| <b>Sector Concentration</b>              | Maximum 35% of Total Commitments invested in any single Sub-Sector (as defined in Schedule 2 of the LPA). At least 65% of Total Commitments shall be invested in companies headquartered in Western Europe (DACH, UK, Nordics, Benelux, France, Italy, Iberia).                    |
| <b>Geographic Concentration</b>          | Maximum 15% of Total Commitments invested outside Europe; maximum 8% of Total Commitments invested in Asia-Pacific                                                                                                                                                                 |
| <b>Asset Class</b>                       | At least 75% of Total Commitments shall be invested in private equity securities of operating businesses. Remainder may include convertible notes, SAFE-equivalent instruments, and direct secondary positions in target Sub-Sectors.                                              |
| <b>Borrowing</b>                         | GP may incur fund-level subscription line indebtedness up to 25% of unfunded Capital Commitments for cash management purposes; portfolio-company-level indebtedness is unrestricted                                                                                                |
| Capital Calls & Distributions            |                                                                                                                                                                                                                                                                                    |
| <b>Capital Calls</b>                     | On not less than ten (10) business days' written notice. Each call applied pro-rata to all LPs based on Capital Commitments. The GP may exercise discretion regarding the order and quantum of investment-specific draw-downs                                                      |
| <b>Recycling Provision</b>               | The Fund may recycle distributions from realisations occurring during the Investment Period for new investments, provided that (i) recycled amounts do not exceed 25% of Total Commitments and (ii) recycling is completed within 24 months of the original realisation [LPA §6.3] |
| <b>Distributions</b>                     | Realisations distributed to LPs within 60 days of receipt by the Fund, subject to a minimum threshold of €5 million in aggregate distributable proceeds. Special distributions may be made at GP discretion                                                                        |
| <b>Defaults</b>                          | Default on a Capital Call results in: (i) suspension of distribution rights, (ii) interest accrual at 12% on the defaulted amount, and (iii) optional acquisition of the defaulting LP's Capital Account at a 25% discount by the GP or other LPs [LPA §5.7]                       |
| Fees, Expenses & Offsets                 |                                                                                                                                                                                                                                                                                    |
| <b>Transaction &amp; Monitoring Fees</b> | Any transaction, monitoring, advisory, directors', or break-up fees received by the GP or its affiliates from Portfolio Companies shall be 100% offset against Management Fees payable to the Fund                                                                                 |
| <b>Organisational Expenses</b>           | Organisational and offering expenses of the Fund borne by the LPs, capped at €2.5 million in aggregate; any excess shall be borne by the GP                                                                                                                                        |

**Operating Expenses**

Ordinary fund operating expenses (audit, legal, depositary, administration, insurance, regulatory) borne by the Fund, expected to total approximately 0.20–0.30% of Net Asset Value per annum

## FUND III TERMS

# Term Sheet — Governance & LP Rights

*Continued from previous page. Standard institutional governance with LP-friendly enhancements typical for a third-vintage fund.*

| Governance                          |                                                                                                                                                                                                                                                                                                                                                                                     |
|-------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>LP Advisory Committee (LPAC)</b> | Comprises representatives of LPs holding at least €25 million of Capital Commitments individually (subject to maximum of 8 members). Meets quarterly and on call. LPAC consent required for: (i) conflicts of interest, (ii) investments outside the Mandate, (iii) waivers of investment restrictions, (iv) extension of the Fund Term, (v) appointment of replacement Key Persons |
| <b>Investment Committee</b>         | GP-internal committee comprising the Managing Partner and at least two additional Partners. All investment decisions exceeding €15 million require unanimous Investment Committee approval; decisions exceeding €40 million require an additional independent industry adviser sign-off                                                                                             |
| <b>Annual General Meeting</b>       | Held in Frankfurt am Main or virtually, on or before 30 June each year. Quarterly LP webcasts with financial performance review and portfolio commentary                                                                                                                                                                                                                            |
| <b>Reporting Cadence</b>            | Quarterly capital-account-level reports within 45 days of quarter-end; audited annual report within 120 days of year-end. ILPA Reporting Template 2.0 compliance with extended sub-sector disclosure                                                                                                                                                                                |
| LP Rights                           |                                                                                                                                                                                                                                                                                                                                                                                     |
| <b>Most-Favored-Nation (MFN)</b>    | All LPs entitled to election rights with respect to material side letter terms granted to other LPs of equal or smaller commitment size, subject to standard exclusions (regulatory, tax, ERISA-specific accommodations, sovereign-immunity, and confidentiality provisions)                                                                                                        |
| <b>Co-Investment Rights</b>         | LPs holding €50 million or greater Capital Commitments shall have priority access to syndicated co-investment opportunities, allocated pro-rata to commitment size after the Fund's primary allocation. Co-investment expected to total approximately 15–25% of fund-level deployment                                                                                               |
| <b>Transfer Rights</b>              | LP interests freely transferable to affiliates and successor entities (including pension fund mergers, internal reorganisations) without GP consent. Other transfers require GP consent, not to be unreasonably withheld                                                                                                                                                            |
| <b>Information Rights</b>           | Standard institutional reporting plus quarterly portfolio company KPI dashboards via dedicated LP portal. Monthly call with the Managing Partner available for LPs holding €100 million or greater Capital Commitments                                                                                                                                                              |
| Removal Rights                      |                                                                                                                                                                                                                                                                                                                                                                                     |

|                               |                                                                                                                                                                                                                                                                                                                    |
|-------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>No-Fault Removal of GP</b> | Upon the affirmative vote of LPs representing at least 75% of Capital Commitments, the GP may be removed without cause; upon removal, GP entitled to 100% of accrued Carried Interest and a fair termination payment determined by an independent valuation expert                                                 |
| <b>Cause Removal of GP</b>    | Upon the affirmative vote of LPs representing at least 50% of Capital Commitments, the GP may be removed for Cause (gross negligence, wilful misconduct, fraud, or material breach of the LPA continuing for 30 days after notice). Upon Cause removal, GP entitled to no carry and forfeits unvested entitlements |

## FUND III TERMS

# Term Sheet — Key Person, ESG, Successor & Other Provisions

*Continued from previous page; final page of Term Sheet summary.*

| Key Person Provisions               |                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|-------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Key Persons</b>                  | Dr. Marcus A. Drakenberg, Henrike Vorberg, and Edvard Lykke-Olesen are designated Key Persons of the Fund                                                                                                                                                                                                                                                                                                                                         |
| <b>Key Person Event</b>             | A Key Person Event occurs if any two (2) Key Persons cease, for any reason, to devote at least 75% of their professional time to the affairs of the Fund and the GP. Upon a Key Person Event: (i) the Investment Period is automatically suspended; (ii) the LPAC is notified within five business days; (iii) the LPs may, by 50% vote of Capital Commitments, terminate the Investment Period or appoint replacement Key Persons within 90 days |
| Successor Fund & Conflicts          |                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| <b>Successor Fund Restriction</b>   | The GP and its affiliates shall not raise or activate a successor fund with a substantially similar mandate until the earlier of: (i) 75% of Total Commitments of the Fund have been invested, (ii) the end of the Investment Period, or (iii) LPAC consent. Pre-marketing activities permitted from 60% deployment                                                                                                                               |
| <b>Conflicts of Interest Policy</b> | All material conflicts of interest, including co-investments by GP affiliates, transactions with portfolio companies of prior funds, and consulting engagements by the GP team, require LPAC disclosure and consent. Annual conflicts-of-interest report distributed at the AGM                                                                                                                                                                   |
| <b>Cross-Fund Investments</b>       | The Fund may invest alongside Fund II in follow-on rounds where Fund II is unable to meet its full pro-rata, subject to (i) LPAC consent, (ii) third-party-led pricing, and (iii) Fund III taking no more than 80% of the unfilled allocation                                                                                                                                                                                                     |
| ESG & Responsible Investment        |                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| <b>ESG Framework</b>                | The Fund operates within the GP's published Responsible Investment Policy, aligned with PRI Guidelines and the SFDR Article 8 framework. Pre-investment ESG screening is mandatory; post-investment ESG action plans agreed with each portfolio company within 6 months of investment                                                                                                                                                             |
| <b>Reporting</b>                    | Annual ESG and Principal Adverse Impact (PAI) statement published by 30 June each year, covering the prior calendar year. Climate-related disclosures aligned with TCFD recommendations                                                                                                                                                                                                                                                           |
| <b>Exclusions</b>                   | Investments excluded in: weapons systems, fossil fuels (upstream and unconventional), tobacco, controversial-weapons supply chain, and any business causing material harm to magical-equid welfare as defined by the IFMEW Welfare Standards (2023 revision)                                                                                                                                                                                      |

**Other**

|                                         |                                                                                                                                                                                            |
|-----------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Indemnification</b>                  | Standard indemnification of the GP, AIFM, depositary, and their affiliates by the Fund, subject to standard carve-outs for fraud, gross negligence, wilful misconduct, and material breach |
| <b>Side Letters</b>                     | GP entitled to enter into side letters with individual LPs subject to MFN provisions described above                                                                                       |
| <b>Governing Law &amp; Jurisdiction</b> | The LPA shall be governed by the laws of the Grand Duchy of Luxembourg. Disputes shall be subject to the exclusive jurisdiction of the courts of Luxembourg City                           |

## PROCESS

# Fundraising Process & Timeline

*We are conducting a managed process designed to close at €750m target by Q3 2026 first close, with final close by Q1 2027.*

| Phase               | Period            | Activities                                                                                                                     | Key Milestones                                                                                                        |
|---------------------|-------------------|--------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------|
| Pre-Marketing       | Q4 2025 – Q1 2026 | Soft pre-marketing to existing LPs and select new investor relationships; PPM drafting and regulatory documentation            | Reverse-solicitation enquiries documented; AIFM authorisation refresh; LPA first draft circulated to anchor investors |
| Active Marketing    | Q1 2026 – Q2 2026 | Formal launch of fundraise; investor meetings; due diligence facilitation; data room access; reference calls                   | Anchor investor commitments secured; data room finalised; PPM and LPA distributed                                     |
| First Close         | Q3 2026 (target)  | First Closing Date – minimum €350m of Capital Commitments target; investment activities may commence subject to LPA conditions | FIRST CLOSING DATE                                                                                                    |

## EXISTING LP BASE

# Continuity from Fund II

*Approximately 78% of Fund II Capital Commitments are held by LPs we expect to re-up in Fund III, providing a strong base of relationship continuity from which to build.*

Figure 6. Fund II LP base composition by category. Proxy for the institutional anchor base for Fund III.

## Anchor Investor Outreach

Soft conversations with twelve of our largest Fund II LPs began in Q4 2025. Initial reception is encouraging; indicative re-up commitments totalling approximately €280 million have been informally expressed, subject to final due diligence and committee approval. We are conscious that several large pension fund LPs are subject to multi-year commitment-pacing approval cycles which may push their formal commitments toward the latter portion of the fundraising window.

## Strategic Geographic Expansion

We are conducting targeted outreach to four institutional categories where Fund III is positioned to grow the LP base: (i) North American pension funds with PE mandates of €15bn+; (ii) Asian sovereign wealth funds where we have placement agent relationships; (iii) European insurance balance-sheet investors where regulatory treatment of magical-equid biotech has improved under Solvency II; (iv) family office consortia targeting institutional-quality biotech exposure.

## LEGAL

# Important Information & Disclosures

**Confidential Document**

This document has been prepared by Unicorn Ventures Partners GmbH & Co. KG (the “GP”) solely for the purpose of providing certain prospective investors with information regarding Unicorn Ventures Fund III, SCSp (the “Fund”). It is strictly confidential and is intended solely for the recipient. The recipient may not reproduce, distribute, or otherwise share this document, in whole or in part, without the prior written consent of the GP.

**Not an Offer or Solicitation**

This document does not constitute an offer to sell or a solicitation of an offer to purchase any interest in the Fund. Any such offer or solicitation will be made only by means of the Fund's confidential Private Placement Memorandum (the “PPM”) and Limited Partnership Agreement (the “LPA”), which will be furnished to qualified prospective investors on a confidential basis at their request and which will supersede the information contained in this document in its entirety.

**Forward-Looking Statements**

This document contains forward-looking statements regarding the Fund's strategy, investment opportunities, market environment, and prospective performance. Forward-looking statements are subject to numerous risks, uncertainties, and assumptions; actual outcomes may differ materially from those projected. The magical-equid biotech sector is subject to scientific, regulatory, commercial, and macroeconomic risks that may materially impair the Fund's ability to achieve its investment objectives. Past performance of Fund I, Fund II, or any portfolio company is not indicative of future results.

**Performance Data**

Track record figures for Fund I and Fund II are presented as at 31 December 2025 and have not been audited at the date of this presentation. Final 2025 audited figures will be presented in the respective Annual Reports to be published in March 2026. Net IRR, TVPI, and DPI figures reflect actual cash flows between the respective Funds and their Limited Partners; unrealised valuations follow IPEV Valuation Guidelines (December 2022). Benchmark comparisons reference Cambridge Associates published European Venture Capital benchmark data; Q3 2025 figures are extrapolated.

**Eligible Investors**

Investment in the Fund is restricted to professional investors as defined under Directive 2014/65/EU (MiFID II) and the AIFMD. Investment is not suitable for retail investors. Prospective investors should consult their own legal, tax, and regulatory advisers regarding the suitability of investment, having regard to their own circumstances.

**Document Status**

This is a fictional document prepared solely for software testing purposes. Unicorn Ventures Fund III, SCSp is not a real entity. Any resemblance to real investment funds, portfolio companies, individuals, or transactions is coincidental. The information contained herein has been generated for the purpose of testing automated document processing pipelines and is not intended to inform any actual investment decision.
