LETTER FROM THE MANAGING PARTNER

A Year of Consequence

Dear Limited Partner,

It is customary for a year-end letter to reach for the descriptive. Resisting that instinct is, in our experience, one of the more consequential disciplines in our business: years are rarely as extraordinary in the moment as we describe them, and almost never as ordinary as we recall them ten years later. Twenty twenty-five was, in our assessment, genuinely consequential — not because of how it changed our overall fund-level trajectory (the year's IRR gain of approximately 5 percentage points is handsome but not exceptional for the vintage stage), but because of what three specific events may come to mean over the fund's next three to four years.

Net Asset Value closed the year at €420.0 million, an increase of +€38.5 million versus Q3 2025 and +€132.6 million versus year-end 2024. Fund II ended the year with an IRR since inception of 17.9% net, TVPI of 1.52x, and DPI of 0.38x. The DPI figure in particular merits attention: Q4 2025 delivered €45.0 million in distributions, a number that — for context — exceeds the cumulative distributions of the fund's first ten quarters combined, and reflects the simultaneous occurrence of the Ætherhoof secondary trim in November and the Celestial Mane in-license upfront payment in December.

“The fund's 2025 is fairly characterised by three events, each significant in its own right: the Celestial Mane Phase IIb read and subsequent strategic transaction, the Ætherhoof concentration trim executed under LPAC endorsement, and the completion of our portfolio at fourteen holdings. We carry all three into 2026 with confidence, and without complacency.”

On Celestial Mane: following the positive Phase IIb read-out in September, the strategic process that the board initiated in October concluded on 18 December 2025 with the announcement of a global in-license transaction for CMB-104 with a major animal-health multinational. The transaction structure comprises \$220 million upfront, up to \$680 million in regulatory and commercial milestones, and tiered double-digit royalties on net sales. For the fund, this transaction resolves the clinical, regulatory and commercial risk of the position while preserving meaningful upside through milestone and royalty economics. Our valuation methodology has shifted accordingly from probability-weighted standalone DCF to the contracted milestone cash-flow pattern, generating a modest further mark-up to €78 million.

On Ætherhoof: the concentration remediation plan described at Q3 has been executed. In November 2025, the fund completed a partial secondary sale, reducing our fully-diluted ownership from 14.8% to 11.2% at a transaction price implying a pre-money valuation of €585 million. The transaction was structured as a sale to two incoming LP co-investment vehicles at arm's length, generating €21.0 million of proceeds and a realised gain of €18.0 million. The residual position remains our second-largest holding; company execution is strong, with Q4 ARR reaching €88.5 million.

On portfolio completion: we added two investments in the quarter. Stellargrove Therapeutics GmbH, a Munich-based precision pharmacogenomics platform, closed as our fourteenth and expected final portfolio company in December 2025. We led a €24 million Series B with a €9.5 million primary

investment. With this addition, the investment period effectively concludes — we have approximately €30 million of residual new-deal capacity which we expect to retain for opportunistic deployment or return to LPs at period end in Q2 2027. Our dry powder is otherwise earmarked for defensible follow-on participation.

A fuller year-in-review will be presented at the 2025 Annual Report, scheduled for publication in March 2026 alongside audited financial statements. The fund's auditors, KPMG Luxembourg, have commenced the 31 December 2025 year-end valuation review; their findings will be incorporated into the Annual Report. We thank you for your continued partnership, and wish you and your families a restful end to 2025 and a promising 2026.

Yours faithfully,

Dr. Marcus A. Drakenberg

Fund Snapshot

Fund Name	Unicorn Ventures Fund II, L.P.
Vintage Year	2022
Fund Size (Commitments)	€500.0 million
Strategy	European early-growth equity in magical-equid biotech and adjacencies
Investment Period	5 years (through Q2 2027)
Fund Term	10 years + two one-year extensions
Reporting Currency	Euro (EUR)
Reporting Date	31 December 2025
General Partner	Unicorn Ventures Partners GmbH & Co. KG

AIFM	UVP Management S.à r.l. (Luxembourg)
Fund Administrator	Kendris AG (Zurich)
Depository	Banque de Luxembourg S.A.
Auditor	KPMG Luxembourg S.à r.l.

EXECUTIVE SUMMARY

Key Performance Indicators — Q4 2025

The summary metrics below reflect the fund's position as at 31 December 2025. All figures are presented in Euro and on a net-to-LP basis unless otherwise indicated. A more granular breakdown of each line item follows in Parts II and IV of this report. Year-end valuations are subject to final review by the fund's auditors, KPMG Luxembourg, as part of the 31 December 2025 financial statement audit; any subsequent adjustments will be reflected in the 2025 Annual Report and not in this Q4 report.

NET ASSET VALUE €420.0m +€38.5m QoQ	IRR SINCE INCEPTION 17.9% +110 bps QoQ	TVPI (NET) 1.52x +0.07x QoQ	DPI (NET) 0.38x +0.16x QoQ
COMMITTED CAPITAL €500.0m	CALLED CAPITAL €378.2m 75.6% of commitment	UNFUNDED COMMIT. €121.8m 24.4% of commitment	PORTFOLIO COMPANIES 14 +1 in Q4 (Stellargrove)

Summary of the Quarter

- Celestial Mane in-license transaction announced 18 December 2025: \$220m upfront, up to \$680m in regulatory and commercial milestones, and tiered double-digit royalties. The fund's valuation methodology has shifted from probability-weighted standalone DCF to contracted milestone cash-flow pattern, generating a +€6.0m mark-up to €78.0m. The upfront cash payment is reflected in Q4 distributions.
- Ätherhoof concentration remediation executed via partial secondary sale in November 2025, reducing ownership from 14.8% to 11.2% and realising €18.0m in gains. The transaction restored single-position concentration well below the 15% hard cap. Residual position retains strong exposure to continued execution (Q4 ARR €88.5m).
- Stellargrove Therapeutics closed as the fund's fourteenth and expected final portfolio holding on 19 December 2025. The fund led a €24m Series B with a €9.5m primary commitment. Stellargrove is a precision pharmacogenomics platform based in Munich.
- Continued broad portfolio execution in the quarter. Glimmerhorn closed its Series C at €175m pre-money (+€6.4m mark-up). Radiant Coat Labs closed its Series A with an Inventure-led round (+€0.9m mark-up, first quarter above cost since inception). Empyrean Stables recorded its third consecutive positive-EBITDA quarter; the turnaround is substantively complete.
- Capital calls of €17.5m (3.5% of commitment) were issued during the quarter, of which €9.5m funded Stellargrove and €8.0m funded follow-on participations, management fees, and fund operating expenses. Distributions totalled €45.0m — the largest quarterly distribution figure in the fund's history to date by a factor of four — reflecting the simultaneous Ätherhoof secondary proceeds (€21.0m) and Celestial Mane upfront payment attributable to the fund's pro-rata share (€20.2m).

Deployment Progress

Figure 1. Fund deployment against total commitments as at 31 December 2025. Percentages shown are relative to total commitment of €500m.

MARKET COMMENTARY

The Year That Validated the Thesis

Q4 2025 brought, in many ways, the perfect coda to the year: continued measured activity through October and November, and a genuinely transformative sector event in December — the Celestial Mane in-license transaction with a major animal-health multinational. The broader European equine and magical-equid biotech segment is closing the year with meaningful validation across all of its principal sub-sectors, and with a more discernible investor appetite for later-stage assets than we had observed at any point since early 2023.

Preliminary full-year 2025 Dealroom data indicates aggregate European equine-biotech funding of approximately €1,275 million — a 5% increase versus 2024 (€1,215 million) but still well below the 2021 peak (€2,070 million). More informatively, the composition of 2025 funding was materially more concentrated in later-stage, operationally-demonstrated companies than 2024: Series C and later accounted for 41% of full-year funding (2024: 29%), a shift we interpret as a healthy maturing of the sector's capital markets.

Sub-Sector Dynamics

Veterinary Biotech was the year's headline sub-sector. The Celestial Mane in-license transaction (our portfolio) represents, by our analysis, the largest single-asset veterinary biotech deal ever announced in the magical-equid space. Broader sector activity has accelerated: two further Series B rounds closed in Q4 at meaningfully above-plan valuations, and we are aware of at least three other companies that accelerated their fundraising timing following the September Phase IIb read-out. Regulatory tailwinds remain supportive; the EMA's PRIME scheme is now firmly established as a viable accelerated pathway for magical-equid therapeutics.

Horn Materials saw Glimmerhorn's successful Series C close at €175m pre-money as the sub-sector's single most prominent 2025 transaction (our portfolio). Two competing platforms have now formally engaged advisers and are expected to launch similar processes in H1 2026. Manufacturing scale-up remains the sector's principal operational constraint; demand visibility from luxury goods, orthopaedic, and musical instrument verticals continues to strengthen.

Genetics & Breeding closed the year with continued but moderating momentum. A €36m Series B completed in early Q4 at a pre-money of €210m (as referenced in our Q3 commentary) was followed by two smaller Series A rounds at price points we consider consistent with a normalised underwriting environment. Our Ätherhoof position continues to set the performance benchmark for the sub-segment.

Nutrition & Feed closed 2025 as a subsector of consolidation rather than growth. Margin recovery through H2 2025 for our Silvermane Pastures position has materialised essentially to plan (12.5% full-year EBITDA vs 11% Q1 trough), and NobleMane's WiesenGold integration completed on target. The unusually warm autumn tempered Q4 seasonal feeding; management at both companies characterises this as transient.

Digital & Data delivered a notably positive 2025 exit from its extended digestion period. Prismatic Equine (our portfolio) achieved break-even in Q3 and modest positive EBITDA in Q4 — a full quarter ahead of the timeline underwritten at investment. Radiant Coat's successful Series A at a €12m pre-money confirmed the inflection first visible in the Q3 unit economics. Morgenstern Breeding Systems completed its first full quarter in the portfolio with sequential 20% customer growth.

Sector Heatmap — Year-End 2025

Genetics & Breeding	Strong	Strong	Neutral	Strong	Neutral
Veterinary Biotech	Strong	Strong	Strong	Strong	Strong
Equine Nutrition	Neutral	Neutral	Neutral	Neutral	Strong
Horn Materials	Strong	Strong	Strong	Weak	Weak
Digital / Data	Neutral	Strong	Neutral	Neutral	Strong
	2025 Full-Year Funding	Valuation Multiples	Exit Activity	Regulatory Tailwind	Talent Availability

Figure 2. Year-end 2025 qualitative assessment of key dynamics across five sub-sectors of relevance to the fund's mandate. Veterinary Biotech and Horn Materials both strong across all dimensions, reflecting the Celestial Mane and Glimmerhorn transactions respectively. Represents GP opinion and is not based on external ratings.

FUND PERFORMANCE

Performance Overview — Fund II vs. Benchmark

Unicorn Ventures Fund II's performance is presented below on a net-to-LP basis, calibrated against the Cambridge Associates European Venture Capital benchmark (median) for the 2022 vintage cohort. All figures are shown as at 31 December 2025 unless otherwise indicated. Since-inception internal rate of return is calculated using actual cash flows between the fund and its limited partners, with the residual NAV treated as a terminal value at the reporting date. Year-end figures are subject to audit review.

Performance Measure	Q4 2025	Q3 2025	Q4 2024	Since Inception
Net IRR	n/a	n/a	n/a	17.9%
Gross IRR	n/a	n/a	n/a	22.1%
TVPI (Net)	1.52x	1.45x	1.27x	1.52x
DPI (Net)	0.38x	0.22x	0.13x	0.38x
RVPI (Net)	1.14x	1.23x	1.14x	1.14x
PIC (Paid-In / Commitment)	75.6%	72.1%	61.5%	75.6%
Loss Ratio (capital at risk)	—	—	—	1.2%

Quarterly point-in-time IRRs are not presented as they are considered non-meaningful for an unrealised private portfolio. Benchmark comparator data is sourced from Cambridge Associates European VC Q3 2025 update; Q4 2025 benchmark data is not yet available at the time of writing. Full-year 2025 net IRR was 4.7 percentage points, representing the strongest single-year performance of the fund's vintage to date.

IRR Trajectory vs. Benchmark

Figure 3. Fund II net IRR since inception, charted against the Cambridge Associates European Venture Capital benchmark (median) for the 2022 vintage. Benchmark data for Q4 2025 extrapolated from CA Q3 2025 release.

TVPI / DPI Evolution

Figure 4. Quarterly build-up of Total Value to Paid-In (TVPI) decomposed into realised (DPI) and unrealised (RVPI) components. DPI has materialised from negligible in Q3 2023 to 0.38x at Q4 2025 period-end.

NAV BRIDGE

Net Asset Value Movement — Q3 2025 to Q4 2025

The chart below decomposes the quarter's NAV movement into its constituent components. Of the +€38.5 million net change, the largest single contributor is unrealised fair-value movements (+€47.8m), partially offset by net negative capital movements of €27.5m (€17.5m calls less €45.0m distributions). The quarter's realised gains of €18.0m reflect the Ätherhoof secondary trim executed in November 2025. The FX and other line is materially smaller than in prior quarters reflecting stabilisation of major-currency exposures against the Euro in Q4.

Figure 5. NAV bridge, Q3 2025 to Q4 2025. All figures in EUR million. The €45m distributions line is the largest in the fund's history, reflecting the Ätherhoof secondary proceeds and Celestial Mane upfront milestone payment. Positive unrealised movement is stated before manager's carry accrual.

Attribution by Portfolio Company

The table below disaggregates the €47.8m of net unrealised fair-value movement by underlying portfolio company. All fourteen current portfolio positions recorded flat or positive movements this quarter.

Portfolio Company	Method	Fair Value (€m)	% Contribution
Glimmerhorn Ltd.	Market — Series C external price	+6.4	9.8%
Celestial Mane Biotech S.A.	Contracted milestone DCF	+6.0	9.1%
Ätherhoof (residual position)	ARR-based DCF	+5.2	7.9%
Empyrean Stables Plc	Revised DCF (cont'd recovery)	+1.2	1.8%
Starbridle Therapeutics B.V.	Milestone DCF (Phase I)	+1.1	1.7%
NebulaScan Imaging S.A.	ARR-based mark-up	+0.9	1.4%

Radiant Coat Labs AB	Series A external price	+0.9	1.4%
Ironhorn Diagnostics s.r.l.	Revenue-stage adjustment	+0.8	1.2%
Morgenstern Breeding Systems Oy	ARR-based mark-up	+0.8	1.2%
NobleMane Holdings ApS	EBITDA multiple	+0.6	0.9%
Prismatic Equine S.A.	Market multiple (break-even)	+0.6	0.9%
Lumenhoof AG	DCF continued normalisation	+0.4	0.6%
Silvermane Pastures Oy	EBITDA multiple	+0.3	0.5%
Stellargrove Therapeutics GmbH	Cost (recent investment)	0.0	0.0%
Gross Unrealised Fair-Value Movement		+65.2	—
Less: carried interest accrual (20% over hurdle)		(17.4)	
Net unrealised fair-value movement to LPs		+47.8	100.0%

Gross unrealised fair-value movement of +€65.2m is reduced by a €17.4m carried-interest accrual reflecting the quarter's aggregate step-ups. Net-to-LP unrealised fair-value movement of +€47.8m corresponds to the movement shown in Figure 5. Valuations prepared in accordance with IPEV Guidelines (December 2022). Year-end 2025 valuations are subject to final review by the fund's auditors.

CASH FLOW ANALYSIS

Historical Cash Flows — Since Inception

Fund II's cash flow profile has reached a materially different posture in Q4 2025. Cumulative net cash flows reached the maximum drawdown point at €-243.3m in Q4 2023, and have narrowed progressively since. The Q4 2025 distribution of €45.0m — by a factor of four the largest quarterly distribution figure in the fund's history — has moved cumulative net cash position to €-217m, materially ahead of the J-curve trajectory modelled at fund-raising. The table below presents quarterly contributions, distributions, and the resulting net cash position since the fund's first capital call.

Period	Capital Calls (€m)	Distributions (€m)	Net Flow (€m)	Cumulative Net (€m)
Q3 2022	(12.5)	—	(12.5)	(12.5)
Q4 2022	(18.7)	—	(18.7)	(31.2)
Q1 2023	(22.4)	—	(22.4)	(53.6)
Q2 2023	(31.2)	0.8	(30.4)	(84.0)
Q3 2023	(28.9)	1.4	(27.5)	(111.5)
Q4 2023	(35.6)	2.1	(33.5)	(145.0)
Q1 2024	(29.8)	3.8	(26.0)	(171.0)
Q2 2024	(24.3)	5.2	(19.1)	(190.1)
Q3 2024	(21.7)	6.9	(14.8)	(204.9)
Q4 2024	(19.4)	8.4	(11.0)	(215.9)
Q1 2025	(18.2)	6.1	(12.1)	(228.0)
Q2 2025	(16.4)	8.9	(7.5)	(235.5)
Q3 2025	(18.9)	10.2	(8.7)	(244.2)
Q4 2025	(17.5)	45.0	27.5	(216.7)
Cumulative Since Inception	(315.5)	98.8	(216.7)	

Capital calls and distributions are stated in Euro at the spot rate on the relevant notice or payment date. Cumulative distributions have grown sequentially for ten consecutive quarters. Q4 2025 distributions reflect the €21.0m Åtherhoof secondary proceeds (November) and €20.2m Celestial Mane upfront milestone attributable to the fund (December), plus €3.8m of ordinary-course distributions from portfolio companies.

Quarterly Flow Visualisation

Figure 6. Quarterly capital calls, distributions, and cumulative net cash flow since fund inception. The cumulative line tracks the trough of the J-curve at €-243.3m reached in Q4 2023 and its subsequent recovery.

CASH FLOW ANALYSIS

Forward Outlook — Projected Cash Flows 2025–2031

The forecast below presents the GP's current base-case cash flow projection for Fund II through its scheduled end-of-life in Q3 2032. Projected capital calls are derived from existing portfolio company financing plans and the GP's shortlist of prospective new investments; projected distributions incorporate company-level exit timing assumptions based on current stage, sector comparables, and the anticipated pace of public and strategic acquirer activity in the relevant sub-sectors.

The GP considers the forecast presented here to represent a reasonable central case, with meaningful dispersion around the central estimate in both directions. A formal sensitivity analysis is presented in the Risk Report; interim updates to the cash flow projection will be provided in future quarterly reporting as portfolio milestones are achieved.

Figure 7. Projected capital calls and distributions through fund end-of-life. Shaded regions represent annual capital calls (purple, negative) and distributions (gold, positive); black line indicates cumulative net cash flow.

Year	Capital Calls (€m)	Distributions (€m)	Net Flow (€m)	Cum. Net (€m)	DPI (cum.)
2022 (actual)	(31.2)	—	(31.2)	(31.2)	0.00x
2023 (actual)	(118.1)	4.3	(113.8)	(145.0)	0.02x
2024 (actual)	(95.2)	24.3	(70.9)	(215.9)	0.13x
2025 (actual)	(71.0)	70.2	(0.8)	(216.7)	0.38x
2026 (est.)	(35.0)	105.0	70.0	(146.7)	0.65x
2027 (est.)	(12.0)	145.0	133.0	(13.7)	1.03x
2028 (est.)	(4.5)	160.0	155.5	141.8	1.45x
2029 (est.)	(1.5)	140.0	138.5	280.3	1.82x
2030 (est.)	—	95.0	95.0	375.3	2.07x

2031 (est.)	—	48.0	48.0	423.3	2.20x
Total (fund life, est.)	(368.5)	791.8	423.3		2.20x

Forecast figures marked “est.” represent the General Partner's base-case projections. 2025 is now fully actual. Actual outcomes for future periods will differ, potentially materially. The estimated terminal DPI of 2.20x represents a gross, pre-carry figure; net-to-LP DPI is projected at 1.92x under the fund's 20% carry / 8% preferred return structure. Forecast revisions since Q3 2025 reflect the Celestial Mane in-license transaction (contracted milestone cash flows 2026-2031) and the addition of Stellargrove Therapeutics. All projections are GP base case and are provided for informational purposes only.

PORTFOLIO OVERVIEW

All Fourteen Holdings — As at 31 December 2025

The table below summarises all fourteen current portfolio holdings of Unicorn Ventures Fund II, L.P. The addition of Stellargrove Therapeutics in December 2025 completes the fund's expected portfolio build, marking the effective conclusion of new primary investment activity. Investments are ranked by gross multiple on invested capital (MOIC). Cost and fair value figures are presented in Euro; ownership percentages reflect fully-diluted equity positions after the most recent financing round of each respective company. The Ätherhoof position reflects the post-secondary-trim holding at 11.2%.

Company	HQ	Sector	Stage	Own.	Cost (€m)	Fair Value (€m)	MOIC
Ætherhoof Genomics	Heidelberg	Genetics & Breeding	Series B	14.8%	22.5	63.9	2.84x
Celestial Mane Biotech	Lausanne	Veterinary Biotech	Series B	9.2%	18.0	38.2	2.12x
Glimmerhorn Ltd.	Cambridge	Horn Materials	Series C	6.4%	15.8	29.5	1.87x
Prismatic Equine S.A.	Ghent	Digital / Data	Series A	12.1%	9.5	15.7	1.65x
NobleMane Holdings	Aarhus	Nutrition & Feed	Growth	7.8%	24.2	35.8	1.48x
Starbridle Therapeutics	Leiden	Veterinary Biotech	Series A	15.5%	11.0	14.5	1.32x
Lumenhoof AG	Zurich	Genetics & Breeding	Series C	4.1%	14.0	16.5	1.18x
Silvermane Pastures	Turku	Nutrition & Feed	Growth	6.9%	19.5	21.3	1.09x
Ironhorn Diagnostics	Milan	Veterinary Biotech	Seed / Pre-Seed	18.3%	5.5	5.6	1.02x
Radiant Coat Labs	Stockholm	Digital / Data	Seed / Pre-Seed	11.7%	4.8	4.5	0.94x
Empyrean Stables	Dublin	Genetics & Breeding	Growth	5.4%	17.5	12.4	0.71x
Portfolio Total (14 companies)					162.3	257.9	1.59x

Ownership percentages are stated on a fully-diluted basis, including authorised option pools. Fair values prepared in accordance with IPEV Guidelines (December 2022) and reviewed by the fund's Valuation Committee on 18 April 2025.

Portfolio Composition

Figure 8. Portfolio composition by investment stage (left) and sub-sector (right), weighted by fair value at 31 December 2025.

GEOGRAPHY

Geographic Allocation of Invested Capital

Fund II's portfolio retains a pronounced European bias, consistent with the fund's stated mandate. The German weighting has ticked up to 24% (Q3: 22%) following the addition of Stellargrove Therapeutics (Munich). The Swiss weighting eased marginally from 17% to 15% following the Q4 distribution effects and the corresponding shift in overall portfolio composition. The portfolio retains no US-headquartered companies; US-denominated exposure (4%) is driven entirely by European companies with US clinical or commercial operations.

Figure 9. Allocation of invested capital by headquarters geography of portfolio companies. A company is attributed to the jurisdiction of its operating headquarters rather than its incorporation.

Valuation Dispersion Across the Portfolio

The chart below shows the dispersion of gross multiple-on-invested-capital (MOIC) across all eleven current portfolio positions. The top two holdings contribute disproportionately to aggregate portfolio uplift; a long-tail distribution with a meaningful single write-down is broadly consistent with the shape of a disciplined venture portfolio at this stage of life.

Figure 10. Gross multiple on invested capital (MOIC) by portfolio company at 31 March 2025. The vertical reference line indicates cost (1.00x).

PORTFOLIO COMPANY SPOTLIGHT

Ætherhoof Genomics GmbH

Sector	Genetics & Breeding	Headquarters	Heidelberg, Germany
Stage	Series B (Extension Feb-2025)	Founded	2019
Ownership	11.2% (post Nov-25 secondary)	Board Seat	1 of 5 (Dr. M. Drakenberg)
Initial Investment	Jul 2023 €18.5m	Remaining Cost Basis	€17.0m (post trim)
Fair Value	€65.0m (Q4 2025)	MOIC (Gross)	3.82x

Investment Thesis

Ætherhoof Genomics applies pre-implantation genetic screening and CRISPR-assisted lineage stabilisation to the premium unicorn breeding programme segment. The company's proprietary HORNseq™ platform delivers, on the basis of third-generation outcome data, an estimated 38% reduction in trait variance for horn development across the first three generations versus conventional selection. The business model combines a per-screening fee structure with downstream licensing royalties on verified lineages.

The company was identified in late 2022 during our systematic scan of Heidelberg-cluster spin-outs from the Max Planck Institute for Developmental Biology. Our initial investment thesis rested on three propositions: (i) that horn-development variance represents the single largest driver of economic loss in premium breeding, materially exceeding coat pigmentation and mane luminosity combined; (ii) that the HORNseq platform's ability to integrate with existing studbook registries created material switching costs once adopted; and (iii) that regulatory acceptance of CRISPR-assisted interventions would converge across the EU on a timeline materially compatible with our scheduled exit window. At the two-year mark, each of these propositions has held up materially better than underwritten.

Quarterly Update and Secondary Transaction

The defining event for our Ætherhoof position in Q4 was the partial secondary sale executed on 14 November 2025, reducing fully-diluted ownership from 14.8% to 11.2%. The transaction was structured as a primary sale to two incoming LP co-investment vehicles at a transaction price implying a pre-money valuation of €585 million; proceeds to the fund totalled €21.0 million against a cost basis reduction of €3.0 million, yielding a realised gain of €18.0 million. The trim was executed under the remediation plan endorsed by the LP Advisory Committee in October 2025 following the breach of the 15% single-position hard cap.

Operationally, the company delivered a strong Q4. Annualised run-rate revenue reached €88.5m at period-end, marginally above the €87.9m forecast communicated at Q3. Gross margin recovered to 80% (Q3: 78%) as the Cambridge laboratory approached mature utilisation. Two further Tier-1 studbook registry integrations were executed during the quarter, bringing the total to six. The company guided to €125m ARR exit-rate by Q2 2026 and anticipates a Series C process in H2 2026.

The residual 11.2% position is marked at €65.0m at Q4 2025, which represents 3.82x on the reduced €17.0m cost basis. This reflects a pro-rata step-down from the €79.0m Q3 valuation for the relinquished portion, plus a modest €5.2m further mark-up on the retained portion driven by continued Q4 execution. The position remains the fund's third-largest (post-trim) at approximately

15.5% of NAV, comfortably below the 15% limit given year-end mark-to-market effects across the broader portfolio.

Figure II. Ätherhoof Genomics — annualised run-rate revenue, actual through Q4 2025 and company-case forecast through H1 2026.

PORTFOLIO COMPANY SPOTLIGHT

Celestial Mane Biotech S.A.

Sector	Veterinary Biotech	Headquarters	Lausanne, Switzerland
Stage	Series B (May-2024)	Founded	2020
Ownership	9.2% (fully-diluted)	Board Seat	1 of 6 (observer seat)
Initial Investment	Nov 2022 €12.0m	Total Invested	€18.0m (incl. May-24 follow-on)
Fair Value	€78.0m (Q4 2025)	MOIC (Gross)	4.33x

Investment Thesis

Celestial Mane Biotech is a clinical-stage veterinary biotechnology company focused on the treatment of Equine Lumiferous Deficiency Syndrome (ELDS), the leading cause of mane luminosity loss in captive-bred populations. ELDS affects an estimated 2.1% of the European premium breeding population over the course of a typical breeding career, with limited effective treatment options currently available. The company's lead asset, CMB-104, is a fully-humanised monoclonal antibody targeting the ELDS-causative RADIANT-3 receptor pathway.

Clinical Development Timeline

The chart below summarises the clinical development trajectory of CMB-104. The positive Phase IIb top-line read-out on 4 September 2025 is highlighted as the most consequential milestone. Upcoming milestones include the Marketing Authorisation Application (MAA) submission, targeted for Q1 2026, and commencement of the confirmatory Phase III programme in H2 2026.

Figure 11. CMB-104 clinical development milestones, updated post the positive Phase IIb read-out in September 2025.

The In-License Transaction

Following the September Phase IIb read-out, the strategic process advised by Centerview Partners and Goldman Sachs progressed over October and November 2025. On 18 December 2025, Celestial Mane announced a global in-license transaction for CMB-104 with a major animal-health multinational (the name of which is covered by non-disclosure provisions until the Annual Report publication). The transaction structure comprises: (i) an upfront payment of \$220 million received by Celestial Mane in January 2026; (ii) regulatory and commercial milestones of up to \$680 million, with the first tranche (\$80m) triggered by Marketing Authorisation in the EU or UK; and (iii) tiered double-digit royalties on

net sales, with the upper tier applicable beyond a commercial threshold that the company expects to reach in the second year of commercialisation.

The structure reflects a balance of derisking and upside preservation that the board and the fund jointly negotiated. A full strategic sale was considered and tabled by one of the engaged parties; the board ultimately preferred the in-license structure on the basis that it preserved meaningful long-term economics while resolving the clinical, regulatory and commercialisation risk of the asset. Management retains operational oversight of the CMB-104 development programme through Marketing Authorisation.

Valuation Approach

The fund's valuation methodology has shifted from the probability-weighted standalone DCF applied at Q3 to the contracted milestone cash-flow pattern implied by the December transaction. Specifically: (i) the upfront payment component is treated as a distribution at announcement date, with the fund's €20.2m pro-rata share reflected in Q4 distributions; (ii) contracted milestones are risk-adjusted by regulatory-approval probabilities informed by CMB-104's current profile (approximately 75% probability of initial EU MA, stepping down in later markets and indications); (iii) royalties are modelled against management's commercial forecast, discounted at 12%. The new carrying value of €78.0 million incorporates a further +€6.0 million mark-up from the Q3 level of €72.0m, reflecting the crystallisation of transaction value.

PORTFOLIO UPDATES

Commentary — Remaining Twelve Holdings

The following summaries provide a concise update on each of the remaining portfolio companies not covered in the preceding spotlights, including Stellargrove Therapeutics GmbH which joined the portfolio in December 2025 as the fund's fourteenth and expected final holding. Full company information, including historical performance and position sizing, is available in the online Limited Partner portal at lp.unicornventures.eu.

Glimmerhorn Ltd.

Horn Materials | Cambridge, United Kingdom | Series C | Cost €15.8m | FV €29.5m | 1.87x

Bio-fabricated horn keratin for high-end musical instrument, luxury goods, and orthopaedic implant applications. Pilot facility in Huntingdon operational since Q4 2024, producing 2.1t / quarter. Offtake agreements signed with two undisclosed Tier-1 luxury maisons.

Q4 2025 Update: ISO 9001 and REACH certifications completed February 2025.

Prismatic Equine S.A.

Digital / Data | Ghent, Belgium | Series A | Cost €9.5m | FV €15.7m | 1.65x

Computer-vision breeding management platform used by 1,430 stud farms across Europe. Tracks coat iridescence, gait symmetry, and horn growth curvature via stall-mounted cameras; integrates with studbook registries. SaaS at €2,400 / stable / year with 94% net revenue retention.

Q4 2025 Update: Launched Prismatic Insights™ analytics tier in March 2025.

NobleMane Holdings ApS

Nutrition & Feed | Aarhus, Denmark | Growth | Cost €24.2m | FV €35.8m | 1.48x

Premium equine nutraceutical brand with distribution across 14 European markets. Flagship MoonOat™ line targets coat luminosity; TrinityHorn™ formula supports structural horn density. D2C channel contributes 31% of revenue; retail partners include Zooplus and Horze.

Q4 2025 Update: Acquired Austrian competitor WiesenGold GmbH in January (€9.4m).

Starbridle Therapeutics B.V.

Veterinary Biotech | Leiden, Netherlands | Series A | Cost €11.0m | FV €14.5m | 1.32x

Small-molecule research platform focused on neurological disorders in magical equids, with lead asset STR-218 (oral, once daily) targeting horn-growth dysregulation. Pre-clinical proof-of-concept completed Q4 2024; IND-enabling tox studies ongoing. €18m Series B targeted H2 2025.

Q4 2025 Update: Signed research collaboration with Utrecht University Faculty of Veterinary Medicine.

Lumenhoof AG

Genetics & Breeding | Zurich, Switzerland | Series C | Cost €14.0m | FV €16.5m | 1.18x

In-vitro embryo production and genomic selection services for elite breeding operations. Operates the largest biobank of frozen unicorn gametes in the DACH region. Regulatory headwinds in Q1 2025 following Swiss Federal Food Safety and Veterinary Office (BLV) guidance consultation.

Q4 2025 Update: Engaged Bär & Karrer on BLV consultation response; submission March 2025.

Silvermane Pastures Oy

Nutrition & Feed | Turku, Finland | Growth | Cost €19.5m | FV €21.3m | 1.09x

Vertically integrated organic forage producer with 3,200 hectares of certified pastureland in Southern Finland. Supplies proprietary UV-resilient grass cultivars to ~180 premium breeding operations. Recent margin compression from energy input costs and unseasonal Q1 frost.

Q4 2025 Update: Commissioned hybrid solar-biomass drying facility (€4.2m capex).

Ironhorn Diagnostics s.r.l.

Veterinary Biotech | Milan, Italy | Seed / Pre-Seed | Cost €5.5m | FV €5.6m | 1.02x

Point-of-care diagnostic cartridges for structural horn integrity assessment. Lead product IRON-01 completed CE-IVD marking in February 2025. Early commercial launch targeted for Q3 2025 through specialist veterinary distributor network. Gross margin profile under validation; cartridge COGS currently elevated.

Q4 2025 Update: Closed €3.2m seed extension led by Indaco Venture Partners.

Radiant Coat Labs AB

Digital / Data | Stockholm, Sweden | Seed / Pre-Seed | Cost €4.8m | FV €4.5m | 0.94x

AI-driven coat pigmentation optimisation service combining genomic inputs with individualised nutrition plans. Slower-than-expected enterprise sales cycle; pivot toward self-serve B2B pricing tier underway. Cash runway extended through November 2025 following recent cost restructuring.

Q4 2025 Update: Reduced headcount from 28 to 19 in February 2025 reorganisation.

Empyrean Stables Plc

Genetics & Breeding | Dublin, Ireland | Growth | Cost €17.5m | FV €12.4m | 0.71x

Legacy stud operation acquired in Q4 2022 as a platform consolidation play. Operational turnaround has proven more complex than underwritten; write-down of €5.1m recognised in Q1 2025 following revised base case. New CEO appointed January 2025; 100-day plan in execution.

Q4 2025 Update: Impairment €5.1m recognised; governance strengthened with two new NEDs.

ESG & RESPONSIBLE BREEDING

Environmental, Social & Governance Statement

Unicorn Ventures is a signatory to the Principles for Responsible Investment (PRI) and is committed to the integration of environmental, social, and governance considerations throughout its investment process. The GP maintains a firm-level ESG policy, reviewed annually and last updated in November 2024, which establishes baseline expectations for portfolio company conduct and defines the firm's position on issues of particular relevance to the magical-equid sector, including animal welfare, genetic integrity preservation, and the responsible deployment of CRISPR-derived interventions.

Responsible Breeding Framework

All portfolio companies are required, as a condition of investment, to adhere to the International Federation for Magical Equid Welfare (IFMEW) Code of Conduct, which establishes minimum standards for housing, nutrition, veterinary care, horn preservation, and end-of-life management. Compliance is assessed at initial investment through independent third-party audit and reassessed annually. Eight of our eleven current portfolio companies have achieved IFMEW Tier-1 certification; the remaining three operate in the early-stage therapeutics segment where the code is not directly applicable.

SFDR Classification

Unicorn Ventures Fund II, L.P. is classified as an Article 8 product under the EU Sustainable Finance Disclosure Regulation (SFDR). The fund promotes environmental and social characteristics principally through its investment in companies contributing to improved welfare outcomes, regenerative land-use practices in the forage supply chain, and scientific advances that reduce the intensity of intervention required to maintain magical-equid population health.

The fund's pre-contractual SFDR disclosure is available on our website. Principal Adverse Impact (PAI) indicators have been monitored and reported for the 2024 reference year; the 2024 PAI statement was published on 30 June 2025 and distributed to Limited Partners ahead of the November 2025 Annual General Meeting.

Q4 2025 ESG Highlights

- Celestial Mane Biotech published its third sustainability report in November 2025. Following the December in-license transaction, the reporting boundary has been expanded to include disclosures on the responsible-commercialisation framework negotiated with the licensing partner, particularly around patient access in lower-income breeding markets.
- Stellargrove Therapeutics, our Q4 new investment, has made welfare-centric trial design a core element of its investment thesis: by identifying individual equid drug-response genetic markers, the company's platform enables companion-diagnostic pairing that can reduce adverse-event rates in clinical trials by an estimated 35% versus conventional protocols.

- Full-year 2025 portfolio-level metrics: aggregate Scope 1-2 emissions across the portfolio reduced by approximately 14% versus 2024 on a like-for-like basis, exceeding the 10% fund-level annual reduction target. Aggregate gender balance at board level reached 43% female representation at 31 December 2025 (Q3: 41%), comfortably meeting the fund-level 2027 target two years ahead of schedule.
- The 2024 Principal Adverse Impact statement was published in June 2025; preparation of the 2025 PAI statement has commenced and publication is scheduled for June 2026, consistent with the fund's SFDR Article 8 commitments.

RISK REPORT

Portfolio Risk Summary — Q4 2025

The risk dashboard below summarises four key risk dimensions monitored on an ongoing basis: single-position concentration, currency exposure, vintage-year diversification of capital deployment, and current liquidity position. Risk metrics are recalculated monthly and reviewed by the Investment Committee on a quarterly cadence. Detailed commentary on the fund's approach to each risk category is set out below the dashboard.

Figure 12. Risk dashboard — concentration (top-N holdings as % NAV), currency exposure of invested capital, deployment by vintage year, and liquidity position including available dry powder and known reserves.

Concentration Risk

The concentration position reported at Q3 2025 has been substantially resolved through the November 2025 Ætherhoof secondary transaction. The top-one holding — Ætherhoof Genomics — now represents 15.5% of NAV, marginally above the 15% single-position hard limit. The marginal technical overshoot reflects further modest Q4 mark-up at Ætherhoof; the GP has consulted with the LPAC (at its 22 January 2026 meeting) and the committee has agreed that no further remediation is required at this stage given the proximate reduction below the limit expected through ordinary portfolio dispersion as the remaining positions mature. Top-five concentration stands at 50.0% — exactly at the soft guidance.

The Celestial Mane position, previously the second-largest holding at Q3, now stands at 18.6% of NAV. Following the December in-license transaction, the position's risk profile has materially changed: clinical, regulatory and commercialisation risks are substantially resolved, replaced by counterparty credit risk on milestone payments and market risk on royalty economics. We consider this a meaningfully lower-risk exposure profile, notwithstanding the elevated carrying value.

Currency Risk

71% of invested capital is Euro-denominated. Non-Euro exposure is dominated by sterling (13%), US dollar (9%), Swiss franc (5%) and Danish kroner (2%). The US dollar weighting has ticked up materially as a consequence of the Celestial Mane in-license milestone cash flows, which are USD-denominated under the licensing agreement. The fund will assess systematic hedging of long-dated USD milestones in Q1 2026; near-term USD inflows will continue to be opportunistically hedged on a case-by-case basis.

Liquidity Risk

The fund retains €121.8m of uncalled commitments, against €42.5m of signalled follow-on reserves and approximately €30m of residual new-deal capacity that we expect to either retain for opportunistic follow-on or to return to LPs at period end. With the investment period effectively complete following the Stellargrove close, the fund's liquidity profile is unambiguous. Annual liquidity stress testing, refreshed in January 2026, indicates the fund remains well within all covenanted ratios.

Year-End Valuation Review

The fund's auditors, KPMG Luxembourg, commenced year-end valuation review procedures in December 2025. All thirteen positions for which non-cost valuations apply (the Stellargrove position is at cost as a December 2025 investment) have been reviewed in accordance with IPEV Guidelines (December 2022). Preliminary auditor feedback, received 15 January 2026, does not indicate any proposed material adjustments to the valuations presented herein. Final audit opinion is targeted for mid-February 2026.

Key Risk Matrix

Risk Category	Level	Trend QoQ	Key Mitigant
Concentration (top-1)	Medium	Improving	Q4 secondary executed; now 15.5% vs 20.7% Q3
Counterparty (Celestial milestones)	Low-Med	New	Major animal-health multinational; investment grade
Regulatory (CRISPR)	Medium	Stable	Cross-jurisdictional diversification
Clinical (Celestial Mane Phase IIb)	Resolved	—	Phase IIb successful; transaction executed
Strategic process (Celestial)	Resolved	—	In-license transaction executed Dec 2025
Market (EU VC valuation re-rating)	Medium	Stable	Underwriting discipline
Operational (Empyrean Stables TO)	Low	Improving	Third consecutive positive-EBITDA quarter
Liquidity (dry powder)	Low	Stable	€121.8m uncalled; investment period complete
Currency (non-EUR exposure)	Low-Med	Elevated	USD exposure via Celestial; hedging review Q1-26
ESG (IFMEW compliance)	Low	Stable	Certified at investment; annual reassessment

CAPITAL ACCOUNT STATEMENT

Fund-Level Capital Account — Q4 2025

The following statement summarises the fund-level capital account movements for the quarter ended 31 December 2025, together with full-year 2025 cumulative movements and cumulative totals since inception. Individual Limited Partner capital account statements, prepared at the investor-specific commitment level, are distributed separately by the fund administrator within 45 days of quarter-end. Year-end balances remain subject to final audit review.

Capital Account Movement — EUR	Q4 2025 (€m)	FY 2025 (€m)	Since Inception (€m)
Opening Capital Account Balance	381.5	287.4	—
Capital Contributions	17.5	71.0	378.2
Distributions — Return of Capital	(31.5)	(50.6)	(72.1)
Distributions — Income	(13.5)	(19.6)	(26.7)
Net Contribution / (Distribution)	(27.5)	0.8	279.4
Realised Gains	18.0	23.2	33.7
Change in Unrealised Fair Value	47.8	110.1	134.7
Management Fee Accrual	(1.9)	(7.0)	(26.2)
Operating Expenses	(0.5)	(1.9)	(6.2)
Carried Interest Accrual	(5.2)	(10.4)	(14.7)
FX Translation & Other	0.2	(0.5)	(2.6)
Net Period Result	38.5	114.3	119.5
Closing Capital Account Balance	420.0	420.0	420.0

Management fee is charged at 2.00% per annum on called capital during the investment period, stepping down to 1.50% per annum on net invested capital thereafter. Carried interest accrues at 20% over an 8% preferred return hurdle, on a full-return, European-waterfall basis. Operating expenses comprise audit, legal, administration, and depositary fees. FX translation reflects the revaluation of sterling and dollar-denominated positions to Euro at quarter-end spot rates.

Subsequent Events

Between the 31 December 2025 reporting date and the date of this report, three matters of note have developed. First, the fund's auditors, KPMG Luxembourg, have substantively completed their year-end valuation review; preliminary feedback does not indicate any material valuation adjustments to the figures presented herein, though final audit opinion issuance is targeted for mid-February 2026. Second, the Ætherhoof Genomics November 2025 secondary transaction has been formally reviewed and ratified by the LP Advisory Committee at its regular meeting on 22 January 2026. Third, Celestial Mane Biotech and its licensing counterparty have completed customary closing conditions for the December 2025 in-license agreement; the \$220m upfront payment was received by Celestial Mane on 14 January 2026. The fund's Annual General Meeting took place on 13 November 2025 in Frankfurt am Main; materials from that meeting are available through the Limited Partner portal.

2025 Annual Report

The fund's 2025 Annual Report, prepared in accordance with the Fund Documents and incorporating audited financial statements, will be published in March 2026 and distributed to Limited Partners via the LP portal. The Annual Report will include, in addition to the audited financial statements, a full-year portfolio review, detailed discussion of strategic themes anticipated for 2026, and the 2025 ESG and SFDR Principal Adverse Impact disclosures.

General Disclaimer (Illustrative Template)

The information contained in this document (the “Report”) is provided on a strictly confidential basis for informational purposes only to the recipient as a limited partner of Unicorn Ventures Fund II, L.P. (the “Fund”). The Report may not, in whole or in part, be reproduced, distributed, disclosed, or retransmitted to any other person without the prior written consent of Unicorn Ventures Partners GmbH & Co. KG (the “General Partner”). By receiving this Report, the recipient agrees to abide by the foregoing restriction.

The Report is not an offer to sell or a solicitation of an offer to buy any interest in the Fund or any other security. Any such offering will be made only pursuant to the Fund's Limited Partnership Agreement, Private Placement Memorandum and related subscription documentation (the “Fund Documents”), which contain important information regarding the Fund's investment objectives, strategies, risks, fees, expenses, tax considerations, and potential conflicts of interest. In the event of any inconsistency between the Report and the Fund Documents, the Fund Documents will govern.

Forward-Looking Statements

The Report contains forward-looking statements, including projections of cash flows, valuations, portfolio company milestones, and fund-level performance metrics. Forward-looking statements are subject to significant uncertainties and contingencies, many of which are outside the control of the General Partner. Actual outcomes may differ materially from those projected. No representation or warranty, express or implied, is made as to the accuracy or completeness of any forward-looking statement. The General Partner undertakes no obligation to update any forward-looking statement to reflect subsequent events or circumstances.

Valuation Methodology

Portfolio company valuations have been prepared in accordance with the International Private Equity and Venture Capital Valuation (IPEV) Guidelines, December 2022 edition, using a combination of recent financing round, market multiple, discounted cash flow, and milestone-based methodologies as appropriate to the stage and nature of each investment. Valuations are reviewed quarterly by the Fund's Valuation Committee and are subject to annual audit by KPMG Luxembourg S.à r.l. Valuations reflect the General Partner's good-faith estimate of fair value at the reporting date and may not be realised in any eventual sale or other liquidity event.

Regulatory Status

Unicorn Ventures Fund II, L.P. is a Luxembourg Special Limited Partnership (SCSp) managed by UVP Management S.à r.l., a fully-licensed Alternative Investment Fund Manager under the Luxembourg law of 12 July 2013 transposing Directive 2011/61/EU (AIFMD). The Fund is reserved for professional and well-informed investors within the meaning of Article 2 of the 2007 SIF Law. The Fund is not available to retail investors and is not registered under the U.S. Investment Company Act of 1940 or marketed in jurisdictions where such marketing would be unlawful.
